

Photo sizes for the website

25 September 2026 · Sizes for photographs added to the site.

Every photo on the site is cropped to fill its frame. Use these sizes when adding photographs. A single average of all files on the site is not a useful target: portraits, banners, and logos are mixed together.

Sizes to use

HOME CAROUSEL

1600 × 1070 px

3:2 landscape

JPEG under 400 KB

Right-hand photo on the homepage slider. The frame is landscape. A portrait file loses the top and bottom.

PAGE BANNER

1800 × 1200 px

3:2 landscape

JPEG under 350 KB

Top of inner pages such as About, Knowledge, Compliance, and Contact. A dark green overlay sits on the photo, so keep it bright.

CARDS

1200 × 600 px

2:1 landscape

JPEG under 200 KB

Homepage side cards and the module cards lower on the page. The frame is wide and short.

How the site crops photos

- Put the subject in the centre. Edges are cut off.
- Use landscape photos only. Several current homepage files are tall portraits and are cropped heavily.
- Save photographs as JPEG, sRGB. Leave a little room around faces: the homepage slider zooms about 6 percent, and page banners shift slightly.
- Page banners sit under a dark green wash. Midtones that are already dark will disappear.
- Do not put text inside the photograph. Titles are set in the page layout.

Partner logos

Logos are separate from photographs. Supply a transparent PNG or SVG at twice the size shown in the footer.

Logo	Shown at	Supply at	Shape
CRECO	64 × 64 px	256 × 256 px or larger	Square
ICNL	132 × 68 px	264 × 136 px	Wide
PBORA	180 × 67 px	360 × 134 px	Wide

Files already on the site

Page photos already match the banner size. Homepage photos do not: the ones marked in orange are portraits, or they are much heavier than 400 KB.

Role	File	Pixels	Shape	Weight	Note

Page banner	sources-archive.jpg	1280 × 960	4:3	264 KB	A bit small

Page photos average 1594 × 1078 px and 319 KB, which is the banner spec. Homepage photos average 1536 × 1868 px and 663 KB only because portraits and landscapes are mixed. Do not use that average as the size to match.
